Project Description

Nelson & Pope was retained by the Manhasset-Lakeville Fire District to provide engineering services for the installation of two underground fuel storage tanks and associated piping and dispensers for a gasoline and diesel filling station. N&P performed a detailed site investigation and full code review to identify a suitable location for tanks and equipment. N&P also prepared permit applications and submitted to the Nassau County Fire Marshal for approval.

Relevant Project Components

- Fuel Station Sizing
- Mechanical, Electrical & Plumbing Engineering
- Toxic and Hazardous Materials Permitting
- Fire Suppression System
- Site Planning
