Project Description

Nelson & Pope was retained by the Town of Oyster Bay Housing Authority to perform an investigation and detailed condition report of 47 generators located at nine facilities throughout the Town. Following N&P's reporting of findings and recommendations, N&P was retained to perform design phase services associated with a replacement program as well as design services for new installations at additional locations. As of 2013, N&P prepared plans for two new generators and seven replacement generators. As part of the design work, we performed load investigations to properly size the new generators, as well as preparing all site, electrical, and fuel gas plumbing plans for the installations. N&P also provided bid and construction administration services for the projects.

Relevant Project Components

- Generator and Transfer Switch Condition Inspection
- Generator Sizing
- Electrical Design
- Fuel Gas Plumbing Design
- Site Planning
- Bid Phase Services
- Construction Phase Services
